## PROFESSIONAL SUMMARY

Senior Data Analyst with senior-level expertise delivering actionable business intelligence across healthcare, pharma, and technology sectors. Designed and deployed scalable ETL pipelines and interactive dashboards, cutting manual reporting time by 50% and reducing data errors by 25% for over 60 business users. Partnered with product and engineering teams to build analytics infrastructure that boosted feature adoption by 15% and enabled self-service analytics. Aiming to apply data-driven insights to accelerate strategic outcomes and operational efficiency.

## TECHNICAL SKILLS

- **Languages & Querying:** SQL, Python, R
- **Databases & Warehousing:** PostgreSQL, MySQL, BigQuery, Snowflake, Oracle, Redshift, MongoDB, Hive
- **BI & Visualization:** Power BI, Tableau, Looker, QlikView, Excel
- **ETL & Data Engineering:** Apache Airflow, AWS Glue, Informatica, Talend, SSIS, Databricks, dbt
- **Cloud Platforms:** AWS, Azure
- **Analytics & Modeling:** Statistical Analysis, A/B Testing, Predictive Modeling, Data Modeling, KPI Frameworks, Forecasting
- **AI & Machine Learning:** Regression, Classification, NLP, Model Evaluation, Scikit-learn, Feature Engineering
- **Governance & Quality:** Data Mapping, Data Validation, Risk Assessment, Data Integration, HIPAA Compliance
- **Collaboration & DevOps:** Git, GitHub, JIRA, Docker, Agile/Scrum, Confluence

## PROFESSIONAL EXPERIENCE

### McKesson Corporation

**Aug 2024 - Present**

#### Senior Data Analyst

*Memphis, TN, USA*

- Engineered 12+ ETL pipelines using AWS Redshift and S3 to streamline healthcare data transfers for customer and vendor reporting, reducing data error rates by 25% and improving processing speed by 40%.
- Partnered with cross-functional product and engineering teams to build analytics and reporting infrastructure, enabling rapid identification of key metric trends and driving a 15% increase in feature adoption within six months.
- Developed 8 interactive Power BI and Looker dashboards for customer-facing and internal use, enabling real-time KPI tracking and reducing manual reporting time by 50%.
- Authored documentation for reporting specs, data flows, and infrastructure changes, increasing dashboard adoption and cutting ad-hoc data requests by 30+ per quarter.
- Mentored 5+ team members in advanced AWS and Tableau techniques, reducing dependency on external resources for data analysis by 30% and strengthening team's data capabilities.

### Uber Technologies

**May 2021 - May 2022**

#### Data Analyst

*Hyderabad, India*

- Optimized 50+ SQL queries and automated recurring ETL jobs supporting campaign reporting, reducing system latency by 35% and saving 30+ engineering hours per month.
- Built Tableau dashboards to track operational KPIs, campaign performance, and audience segments, enabling data-driven marketing optimizations that boosted ROI by 18%.
- Conducted in-depth product analytics on driver and rider engagement trends, surfacing behavioral insights that guided feature enhancements and improved user satisfaction scores by 12%.
- Collaborated with marketing and external partners to refine data exchange processes and reconcile reporting discrepancies, improving data quality and reporting accuracy across both organizations.

### Cipla Ltd.

**Nov 2018 - Apr 2021**

#### Data Analyst

*Mumbai, India*

- Leveraged Python, SQL, and AWS (S3, Redshift) to analyze large-scale clinical datasets in compliance with regulatory requirements, improving research accuracy by 20% and enabling faster decisions across 3 departments.
- Designed and deployed 10+ Power BI dashboards providing executives with real-time business insights and performance reporting, reducing decision-making cycle time by 35 hours per month.
- Streamlined scalable ETL workflows and dimensional data models with integrated data validation rules, enabling 60+ business users to access timely and accurate data and boosting operational efficiency.
- Spearheaded development of a patient tracking system that eliminated 30,000+ annual data entry errors and reduced report generation time by 45 minutes per report.

## PROJECTS

### Healthcare Data Pipeline & Reporting Automation

- Designed and deployed end-to-end ETL pipelines ingesting multi-source healthcare data into AWS Redshift, reducing reporting latency from 4 hours to under 30 minutes for cross-functional teams.

- Automated recurring reports using Apache Airflow, eliminating 15+ hours of manual work weekly and improving data freshness for executive dashboards.

### **Customer Churn Prediction Model**

- Built a supervised machine learning model (Random Forest + Logistic Regression) to predict customer churn with 83% accuracy, enabling proactive retention strategies that reduced quarterly churn by 11%.
- Delivered an interactive Tableau dashboard for business stakeholders to monitor churn risk scores and segment at-risk users in real time.

### **Marketing Performance Analytics Dashboard**

- Developed a unified marketing analytics dashboard aggregating campaign data from 5+ channels into BigQuery, enabling data-driven budget allocation decisions and improving overall marketing ROI by 18%.
- Implemented automated data quality checks and anomaly detection scripts in Python, reducing reporting errors by 22% and increasing stakeholder trust in data.

### **Pharmaceutical Clinical Data Analytics Platform**

- Analyzed clinical trial datasets with 1M+ records using Python and SQL for compliance-driven research, improving analysis accuracy by 20% and accelerating regulatory reporting timelines.
- Built a dimensional data model and reporting framework enabling self-service access for 60+ business users across 3 departments, significantly reducing ad-hoc analyst requests.

## **EDUCATION**

### **University of Memphis**

*Master of Science, Management Information Systems*

**Aug 2022 - May 2024**

*Memphis, TN, USA*

## **CERTIFICATIONS**

- **Google Advanced Data Analytics Professional Certificate: Coursera / Google**
- **Google Business Intelligence Professional Certificate: Coursera / Google**
- **SQL (Advanced) Certificate: HackerRank**
- **Python (Basic) Certificate: HackerRank**
